The capacity for timely payment of financial commitments is considered adequate.

6. Financial Highlights

REVENUE AND EXPENDITURE ANALYSIS

Total revenue has increased immensely since acquisition and this is primarily due to increase in finance portfolio and mark-up income on investments. However, during COVID-19, Government significantly reduced interest rates which could not be capitalized during pandemic period. However, in current year the Company started to undertake business again and hope to achieve new heights soon.

Markup expense has decrease significantly due to issuance of right issue in previous year and repayment to outgoing group sponsors loan during the period. Later after application of IFRS -16, certain financial cost is incurred which is primarily relating to branches.
